

ENVIRONMENTAL MANAGEMENT AGENCY

We have foreseen the future; we have seen that what we do today has an effect on what happens tomorrow. That's why we dance to nature's beat and are sensitive to her cry.

The EMA Club is the environment's truest friend. We advocate for the preservation and protection of the environment around our school and the Chishawasha community at large. We have taken up the initiative to plant ornamental trees around the school on each member of staff's birthday. To fulfil our main aim of educating the community, we carry out environmental awareness outreaches and clean up campaigns. The EMA club is a proud member of the Eco-schools programme. There are billions of dreams, but only one planet. Therefore consume it with care.
