

JUNIOR ACHIEVEMENT

The JA Company Program for young people appreciates and understands better the role of business in our society. Through this hands-on experience, we learn about the free enterprise system and how businesses function through the formation of our Golden Innovations Ltd Company. Meeting once a week, for sixteen weeks, we ran our disinfectant company and subsidiary company, Handy Many, where we produced and sold 'Slay Your Life Fashions' (tie and dye t-shirts, beaded t-shirts and bracelets) and what's in my bag? (stationery holders, pencil cases, phone covers). In this program we were required to elect officers, track operations and keep records, conduct stakeholders' meetings and liquidate returning a profit. We were enabled to experience practical essential business concepts and skills; understand economic principles that influence business decisions and foster relationships between students and members of the business community, while exploring various corner opportunities and learning basic workforce readiness skills.
